SUMMARY

Senior Frontend / Full Stack Engineer with 10 years of experience building scalable, high-performance web applications. Expertise in frontend architecture, performance optimization, and AI-assisted engineering.

EXPERIENCE

Senior Frontend / Full Stack Engineer

Obat **April 2022 - Present, France**

- Established AI-assisted engineering workflows, including RFC authoring, ADR reviews, reusable engineering skills, architectural rule enforcement, and automated code reviews.
- Served as the technical reference for AI-assisted development, reviewing AI-generated code, enforcing engineering standards, and mentoring developers to ensure maintainable, production-ready software.
- Led the migration toward Feature-Sliced Design (FSD), defining architectural boundaries and driving frontend architecture decisions focused on maintainability, scalability, and developer experience.
- Architected and delivered a real-time internal chat platform using React (Vite) and a self-hosted Supabase backend, leveraging PostgreSQL triggers, Edge Functions, and Realtime subscriptions.
- Contributed to backend development in PHP/Symfony, applying Hexagonal Architecture principles through AI-assisted development while ensuring clean, maintainable code.
- Optimized frontend performance through rendering optimizations, memoization, and virtualization, reducing load times by 50%.
- Expanded automated test coverage with Vitest and Playwright, enabling safer refactoring, reducing regressions, and increasing release confidence.
- Led accessibility initiatives aligned with WCAG standards, improving usability and ensuring compliance across the application.

Frontend Developer

Happywait **March 2021 - April 2022, France**

- Revamped the mobile app to enhance performance and user experience.
- Resolved bugs to maintain high app stability and reliability, ensuring uninterrupted functionality.
- Developed a scalable design system with reusable components to improve consistency and reduce development time.
- Collaborated with product, UX/UI, and backend teams to optimize designs and integrate new features seamlessly, enhancing overall application coherence.

Frontend Developer

Havas Digital Factory **June 2019 - March 2021, France**

- Directed end-to-end project execution, using modern web technologies for on-time and high-quality deliveries.
- Maintained project integrity by enforcing coding standards, conducting regular audits, and ensuring adherence to best practices.
- Improved development processes by creating and reusing boilerplate code and scripts, which reduced delivery times and enhanced team productivity.

Frontend Developer

Artwaï **February 2017 - June 2019, France**

- Delivered features through feature-driven development, enhancing product functionality and user satisfaction.

- Accelerated delivery timelines and increased user engagement by developing front end for various internal projects.
- Collaborated with clients to provide customized front-end solutions aligned with business objectives, improving overall user experience.

UI Developer

Publihebdos **April 2015 - January 2017, France**

- Revamped the main website to enhance user engagement and decrease bounce rates.
- Established a unified visual identity for various internal projects, enhancing brand consistency and boosting user recognition.
- Maintained project integrity through the enforcement of coding standards, consistent quality checks, and optimal performance throughout all phases.

EDUCATION

Bachelor

Jeanne d'Arc High School • Rennes, France • September 2013

- Web development (HTML, CSS, JS, PHP)
- Web design (UI/UX)

Higher National Diploma

Jeanne d'Arc High School • Rennes, France • September 2012

- Marketing
- Communication
- Economy
- Law

High School Diploma

Jeanne d'Arc High School • Rennes, France • September 2010

- Marketing
- Communication
- Economy
- Law

SKILLS

AI Engineering : Claude Code, AI-assisted development, Engineering automation, AI code reviews, RFC generation

Front End : React, React Native, Next.js, JavaScript, TypeScript, Styled Components, Tailwind CSS, Storybook, React Hook Form, Motion.dev, I18next, Zod

Back End : Node.js, Express.js, NestJS, Symfony, Supabase (Edge Functions, Realtime), PostgreSQL (Triggers), AWS Lambda, REST APIs

State Management & Data Fetching : Tanstack Query, Zustand, Redux, Redux Toolkit

Architecture : Feature-Sliced Design (FSD), Hexagonal Architecture, Real-Time Systems

Testing & Quality Assurance : Jest, Vitest, Cypress, Playwright

DevOps & Tooling : Webpack, Vite, Git

Version Control : Git
